pre•ci•sion [pri'si zh en]

noun: the quality, condition, or fact of being exact and accurate.

Our Mission

To be a leader in the plumbing industry, while surpassing our customers expectations in quality workmanship and customer service.

About Us

Precision Plumbing was established with the needs of our customers in mind. We take pride in doing more than plumbing, we also educate our customers on the importance of a healthy and safe plumbing system.

Precision Plumbing is identifiable by its professionally uniformed Technicians and the photo badges they wear. We hold our own masters plumbing license for St. Louis City and County, and only hires licensed Technicians that are trained not only in plumbing, but how to serve our customer needs.

With more than twenty-five years of plumbing experience within the company, Precision Plumbing stays on top of plumbing trends and ever changing plumbing requirements. We have the knowledge and experience to do the job right. We also understand the best way to keep our customers

happy is through educating them, to make sure that they understand the problem and the work that is to be performed before any work is started. Our Technicians will do a preventative maintenance check on every service call to help the customer know how their systems are performing.

Video Inspections & Line Locating

- Late fall be sure to disconnect garden hose to prevent damage from winter freezing to outside hose bibbs.
- For added protection install a frost free hose bib to prevent freeze damage.
- Install hot water heater blanket to your new or existing heater to help lower your gas bill.
- Never use caustic chemicals for drain problems, they may cause damage to your plumbing systems and may even cause injury.
- To increase the life of your water heater, you should flush your water heater at least once a year.
- Did you know that a small leak can waste 15 to 20 gallons of water a day?

**St. Louis City and County requires a license to perform plumbing work.
Always ask for a license!**
